ECET 250E – Linear Circuits 1 | Fall 2026 | Lab Report and Lab Performance Rubric

Mozhgan Bacon

Name: _____	Lab title: _____	Section / Date: _____

PART A — IN THE LAB (40 points)

Each criterion is scored at one of five performance levels, with the corresponding points shown in the table. Asking questions is expected and encouraged. Independent work is assessed based on your ability to apply guidance, make progress, and troubleshoot after receiving clarification. Delays caused by equipment failure or circumstances outside the student's control will not reduce the progress/completion score. Students must notify the instructor at the time of the equipment failure for it to be considered in scoring.

Criterion	Pts	Exemplary	Accomplished	Developing	Incomplete	Missing	Score
Prelab preparation	10	**10 pts** Lab read in full. Every required prelab calculation is complete, shown with units, and ready to be checked at the start of the period.	**7.5 pts** Lab read and nearly all prelab calculations are complete and shown with units. Minor gaps only.	**5 pts** Some preparation is evident, but several calculations are missing, incomplete, or not shown.	**2.5 pts** Minimal preparation. The lab was not adequately read and calculations are largely incomplete.	**0 pts** No evidence of prelab preparation.	
Independent work and troubleshooting	20	**20 pts** Worked independently, used laboratory equipment safely and appropriately, and used instructor support appropriately for clarification, verification, or genuine troubleshooting. Applied guidance and continued making progress.	**15 pts** Worked largely independently and used equipment appropriately. Asked appropriate questions when needed and was generally able to apply the guidance provided.	**10 pts** Needed frequent intervention to set up, wire, use equipment, measure, or troubleshoot, and had difficulty applying guidance without repeated help.	**5 pts** Could not make meaningful progress without step-by-step direction; instructor intervention was required throughout most of the work.	**0 pts** Not attempted or no assessable in-lab work.	
Progress and completion during the scheduled lab period	10	**10 pts** All required measurements/results completed and demonstrated to the instructor before the end of the period.	**7.5 pts** Essentially complete by the end of the period, with only a small amount outstanding.	**5 pts** Substantial portions remained incomplete by the end of the period; progress was below the expected pace.	**2.5 pts** Very limited progress was made and no usable set of results was obtained during the period.	**0 pts** Not attempted or absent with no assessable in-lab work.	
Part A subtotal	40						

PART B — THE LAB REPORT (40 points)

Criterion	Pts	Exemplary	Accomplished	Developing	Incomplete	Missing	Score
Results: data, figures, graphs, tables and answers to lab questions	25	**25 pts** All required data, figures, graphs and tables are correct, clearly presented, appropriately labelled with units, and numbered/captioned where required. Every lab question is answered completely, measured results are compared with calculated/theoretical or simulated values where required, and relevant anomalies are addressed.	**18.75 pts** Required results are substantially complete and correct, including required comparison with calculated/theoretical or simulated values, with only minor gaps in units, labels, numbering, captions, or written answers.	**12.5 pts** Most required results are present, but several required features or answers are incomplete, unclear, or incorrect.	**6.25 pts** Results contain significant errors or omissions. Required labels, units, captions, numbering, or answers are frequently missing or unclear.	**0 pts** Not submitted or not attempted.	

Criterion	Pts	Exemplary	Accomplished	Developing	Incomplete	Missing	Score
Conclusions	**10**	**10 pts** All important conclusions are clearly stated, technically accurate, and supported by the measured results.	**7.5 pts** All major conclusions are present and generally supported by the results, but some could be stated more clearly or precisely.	**5 pts** Major conclusions are attempted, but several are incomplete, weakly supported, or technically misstated.	**2.5 pts** Conclusions are largely missing, unsupported, or do not address the important outcomes of the lab.	**0 pts** Not submitted or not attempted.	
Presentation and instructions followed	**5**	**5 pts** Written and oral instructions followed. Sections are in the required order, work is clear and readable, and student responses are clearly distinguishable from the provided lab instructions (e.g., contrasting colour).	**3.75 pts** Instructions are substantially followed and the report is organized/readable, with only minor formatting or presentation lapses.	**2.5 pts** Some instructions are not followed. Organization or formatting is inconsistent, and student responses may be difficult to identify.	**1.25 pts** Major instructions are disregarded; sections are out of order, work is difficult to read, or student responses are not clearly distinguishable.	**0 pts** Not submitted or not attempted.	
Part B subtotal	**40**						

PART C — ON-TIME SUBMISSION (20 points)

Delays caused by a documented D2L or campus system outage, or other circumstances outside the student's control, will not be scored as late, provided the instructor is notified as soon as possible and the report is submitted promptly once the issue is resolved.

Criterion	Pts	Exemplary	Accomplished	Developing	Incomplete	Missing	Score
Lab report submitted on D2L	**20**	**20 pts** Submitted on time.	**15 pts** Submitted late, but no more than 24 hours after the deadline.	**10 pts** More than 24 hours and up to 72 hours late.	**5 pts** More than 72 hours and up to 96 hours late.	**0 pts** More than 96 hours late, or not submitted.	
Part C subtotal	**20**						

FINAL MARK	Score	
Part A - in the lab		out of 40
Part B - the lab report		out of 40
Part C - on-time submission		out of 20
TOTAL		out of 100

RULES THAT AFFECT THIS MARK

Report deadline	The completed lab report is due on D2L before the start of your next scheduled lab session: X01A Monday 1:30 pm; X01B Tuesday 11:00 am. Every due date is listed on the Lab Schedule sheet and posted on D2L.
Attendance and make-up labs	Part A can only be earned through assessable in-lab work. All missed required labs must be completed. Make-up arrangements require instructor approval and are subject to available space and equipment. When approved, a documented absence may usually be made up in the other section that week: X01A Monday in TEC 227; X01B Tuesday in TEC 204.
Completion and submission	Lab completion is mandatory. All required labs must be completed to pass the course. A completed lab report must be submitted for the lab to receive a grade. A lab that is performed but never submitted receives 0/100.
Individual work	Labs are conducted individually. Discussion of concepts and troubleshooting is encouraged; however, submitted calculations, measurements, simulation files, graphs, answers, reports, and supporting documents must represent the student's own work. No file sharing is permitted.
