Students registered with the Centre for Accessible Learning (CAL) who complete quizzes, tests, and exams with academic accommodations have booking procedures and deadlines with CAL where advanced noticed is required. Deadlines scan be reviewed on the CAL exams page. http://camosun.ca/services/accessible-learning/exams.html

GRADING ACCORDING TO COLLEGE POLICY (GPA)

A minimum of 60% must be achieved in both the theory and lab portions to pass the course. Less than 60% in either portion will result in a failure of the entire course and **minimum of 50% must be achieved in Final exam to pass the course.**

-To earn credit for the course, it is essential to complete *all labs and lab reports* satisfactorily.
-Each lab is marked out of 100: 40 points for work during the period (prelab preparation, independent work and troubleshooting, completion within the scheduled time), 40 points for the report (results and lab questions, conclusions, presentation), and 20 points for submitting the report on time. Every criterion is scored at one of five levels, Exemplary, Accomplished, Developing, Incomplete or Missing, and nothing is deducted afterwards. The full rubric is posted on D2L.
-Please ensure that you submit your lab reports by the specified due date on D2L.
(Typically, lab reports are expected to be turned in at the beginning of the next week's lab session.)
-On-time submission is scored, not deducted: 20 points on time, 15 if less than 24 hours late, 10 for 24 to 72 hours, 5 for 72 to 96 hours, and 0 beyond 96 hours. A lab completed but never submitted as a report is graded zero out of 100.
-You are required to attend and be on time for ALL labs.
-Because 40 points are earned in the room, a lab that is not attended without a valid excuse forfeits that portion.
-If you cannot attend a lab (for a valid reason) please inform your lab instructor (ahead of time if possible) and arrange to make it up.

Lecture Attendance

To get the most out of this course, students are expected to attend all classes and be on time. It is your responsibility to acquire all information given during a class missed, including notes, hand-outs, changed exam dates etc.

Exam Procedures
All exams must be written at the scheduled times with the exception of students requiring an accommodation by CAL. It is understood that emergency circumstances do occur (e.g. severe illness or family emergency); for such circumstance's accommodation may be offered at the discretion of the instructor, provided the student:
a) notifies the instructor in advance of the exam (not after), and
b) provides documented evidence of the circumstance (e.g. medical certificate).

If an exam is missed with an excused absence, it is up to the instructor's discretion as to how the mark will be made up. In most cases, an oral exam will be scheduled for the student as soon as possible.
Be sure not to make travel plans for the end of semester until the final exam schedules are finalized and posted. Please ask any family members who might make travel plans on your behalf to consult you before booking tickets.
Please note: the use of cell phones during a test or quiz is not allowed and may result in a zero for that assessment.

Study Habits

Good and regular study habits are essential to do well in this course. You should plan on a weekly minimum of 5 hours outside of scheduled class time for the completion of readings, assignments and for general studying. Joining a study group can help make this more achievable.

Lecture presentations will be uploaded to the course website. These should be used as a study guide, not as your sole source of information. You will need to write down additional key words for examples and explanations given during lecture and review text and videos to support your understanding. It is also recommended practice to transform lecture notes into a study-friendly format after each lecture, incorporating additional information from your textbook. Study these notes before the next class to prepare yourself for new material, which will often build on previously covered material.

Please take advantage of office hours if you need extra clarification and help.
